

SILVER WATER SYSTEM™ TESTIMONIALS!

You may not remember but we talked and e-mailed a couple of years ago when I was building a baptismal font at St. Matthews Catholic Church in Tyrone, Georgia. I had searched for a suitable water sterilizer that would be effective without requiring chemicals which might be harmful, especially to infants. Your Silver Water System Ionizer seemed perfect if it performed as advertised. In spite of reservations of several parishioners I went with the Argenia System and I am pleased it has performed beyond expectations.

In March of 2010 it will have been in continuous use for two years. The font water has remained sparkling clear and clean. I had vowed in the beginning I would provide water that I would not be afraid to pour in an infants eyes. Chlorine was out of the question as were other chemical based systems. I use a very small amount of non-chlorine oxidizer to begin the process when the font is refilled with fresh water. I have to admit that, although I could not detect any algae or fungi in the water, I was concerned that there could still be invisible bacteria or viruses. Several hundred hands are dipped in the water weekly which could cause questionable conditions. Some parishioners also had the same concern.

To resolve any concerns prior to replacing the water in September 2009 I provided samples to the laboratory responsible for testing the public water system in my county. The results were very gratifying. There were no contaminants found. The lab technician primarily tested for Coliform, found none and said there was no need to test further for if there were no Coliform present there could be no E-coli or other contaminants present. He also stated the water I provided was some of the purest he had ever seen.

When the results were announced in church the entire congregation applauded (something you seldom see in a Catholic church). Needless to say we are highly pleased with the results of the Silver Water System and have recommended it to other churches.

The last picture is the one I am most proud of; my great grandson being baptized.

Hello! I bought your ionizer system A-750 last year. We live in Florida and had a lot of rain through the pool season and needed the ionizer more than expected, yet no extra chlorine! It works beautifully and I am so grateful that I found this system.

Alicia Montijo, FL, United States

I THOUGHT I WOULD DROP YOU A LINE AND LET YOU KNOW WHAT A FANTASTIC JOB THE IONISER IS DOING DESPITE A HEAVY BATHER LOAD. THE WATER IS CRYSTAL CLEAR, I AM VERY IMPRESSED. I WILL DEFINITELY

RECOMMEND YOUR PRODUCT TO MY CUSTOMERS, FRIENDS, AND FAMILY...

Tom Cottrell, CA, United States

We push your product because we believe in it. When I used chemicals I couldn't make it through one cycle in our hot tub if it wasn't for you guys our hot tub would have been a waste of money. As for the pool, my next door neighbor is allergic to chlorine and he loves the fact that he swims in ours anytime with no issues. So we will continue to sing your praises to anyone who will listen.

Jim Dicks, NS, Canada

Well first things first, thank you Argenia Systems and especially Brian for introducing me to your terrific product. I am so impressed with this product that we invite anyone over for a swim! I was amazed at how easy it was to install and operate. It took no time or effort at all and allowed me more freedom when it came to the daily maintenance of the pool. The water tests were always constant which meant less chemicals needed, never any algae and a saving in time and money! The water sparkled, felt softer and the kids were able to swim without goggles! Combine all this and the fact is.....I enjoyed my pool more than ever before. Thanks again.

The Hill Family, ON, Canada

I recently installed the "Argenia Silver Water System" in our outdoor family spa. The installation was very easy to do and the service that Sabrina from Argenia gave me was excellent.

I have a teenage daughter that has her friends over to use the spa and prior to having the "Argenia System" it would take days and lots of chemicals to clear up the water leaving the spa not usable for that time period but now I am very impressed on how the system has worked on keeping the water crystal clear and no odor to it without the addition of extra chemicals and no out of use time.

I can foresee that changing of the water will be extended considerably as very little chemicals are now used and the water will not become saturated with total dissolved chemicals as before. This means much time savings, costs and out of service time that was related to water changes every 3 – 4 months that was very difficult to do during the winter months. Thank you,

The Hubenig family, SK, Canada

I am grateful for your product and that I invested into your ionizer system. When I installed your ionizer I increased the pump and filter capacity so that I do not have to run the pump as many hours each day. The combination of a somewhat oversized filter and your ionizer system has provided me with excellent results. Your system has greatly reduced my pool maintenance chores and the pool more resilient to variable conditions.

My family enjoys the water experience much more. Visitors nearly always comment on the water's feel, lack of chemical-smell and the clarity of the water.

I am grateful for your product and the reliable function of the system. Your system was easy to understand, install, monitor and the multiple benefits enable us to enjoy the pool more.

Richard Ross, CO, United States

I have been getting unbelievable results from these ionizers and recommend them to all my customers.

Rory Payne, ON, Canada

MORE FEEDBACK...

- Does everything seller stated. We are very pleased. Thank you!
- After a month water's still clear. No Chlorine.
- Great product! Recommend highly to all I speak to!! Keep up the good work! TNX
- Excellent. Goods as described. Well packed. Speedy delivery
- Excellent customer service! System works great! 100% satisfied!
- came as advertised and works well in our pool...I wish we did is sooner
- Another SUPER Deal. This unit is a giveaway at this price!!! RECOMMENDED!
- Item as described, well packaged, QUALITY - QUALITY - QUALITY!!
- Received as promised. It was easy to install and is keeping the pool clear.
- Thank You.. it is treat to swim without burning eyes!
- received as described,ease to install,pro built,good follow up from seller, thanks.
