WHAT IS THE SILVER WATER SYSTEM™?

The Silver Water System™ is a tool for disinfecting and purifying water in pools, spas and fountains. The system replaces highly toxic chemicals with a process known as ionization.

HOW DOES IT WORK?

In very basic terms, the Silver Water System™ works as follows. An electrode made of silver, copper, and zinc is placed in a chamber. This chamber is mounted in the recirculation system of a pool or spa. A safe low voltage DC current controller sends signals to the anode causing microscopic particles (ions) of silver, copper and zinc to be dispensed into the water as it passes through the chamber.

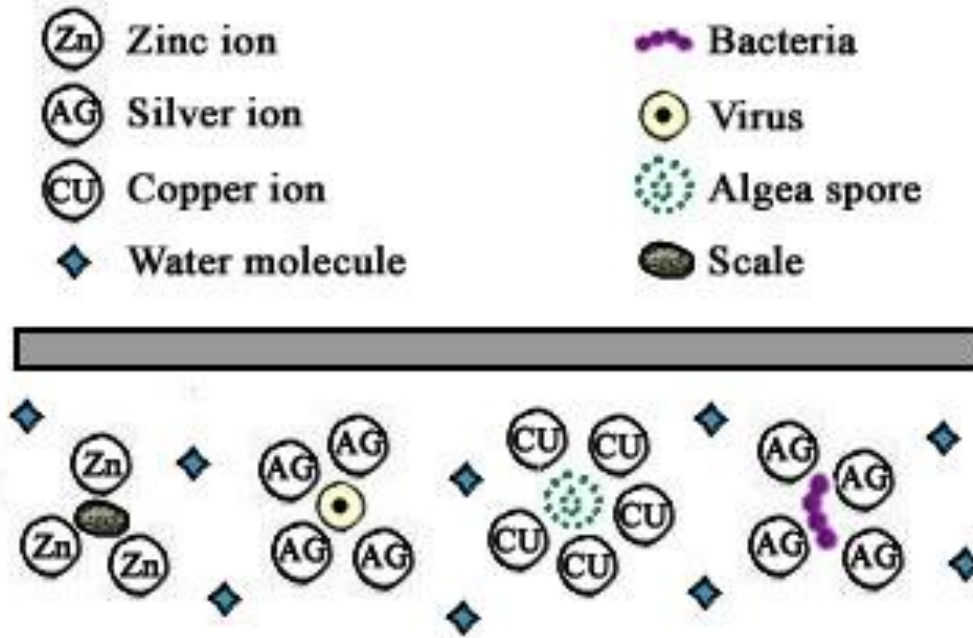

Colloidal Silver (Ag) ions kill all known bacteria, viruses and protozoa such as HIV, Legionella Pneumophila (legionnaire's disease) streptococcus, E-coli, and salmonella. It stimulates the bodies' natural immune system. It has been successfully used in ailments such as acne, athlete's foot, herpes, lesions, poison oak, rashes, septic ulcers, sun spots, skin cancer, warts and yeast infections. Silver is also beneficial in treating minor bites, burns, wounds and scrapes.

Colloidal Copper (Cu) ions prevent algae growth. Copper is one of the best algacide killers known to man. Colloidal Copper improves elasticity of the skin, regulates varicose veins and is a great skin and muscle toner.

Colloidal Zinc (Zn) stimulates healing of the skin and prevents stains and rings on the spa basins.

While lethal to bacteria, many viruses and algae, the system is completely safe for humans, animals and plants.

The ions destroy the algae and bacteria by piercing the outer membrane and disrupting enzyme balance. The ions achieve a highly efficient stable effect in water and hence provide sustained protection by disinfecting the water without the use of any toxins over a lengthy period of time. Even after the filter system has been switched off, this depot effect lasts for more than 2 weeks. Thus, there is no need for repetitive monitoring and readjustments requiring attendance.

IS IT SAFE?

The Silver Water System™ is completely safe as no toxic chemicals are produced or consumed.

WHAT SHOULD I CONSIDER WHEN PURCHASING A SANITIZER?

Chlorine, Bromine (Chemicals)

- ✗ Toxic and Absorbed Through the Skin
- ✗ Burning Eyes, Nose and Throat
- ✗ Itchy, Irritated Skin and Damaged Hair
- ✗ Offensive Odor
- ✗ Linked to Cancer, Organ Damage and Respiratory Problems
- ✗ Pollutes our Water, Air, and Soil
- ✗ Daily Work, Testing and Dangerous Material Handling

Salt Water Generation

- ✗ Generator Cell Produces Chlorine
- ✗ Costly to Operate
- ✗ Corrosive to Liners, Walls and Equipment

Ozone

- ✗ Very Unstable, Little Ozone Makes it Into the Pool Water
- ✗ A High Level of Chemicals is Required
- ✗ Ozone Gas Produced Can Contribute to Health Problems
- ✗ Can Cause a Cloudy Appearance in the Water

Silver Water System™

- ✓ Truly Green, Natural and Environmentally Friendly
- ✓ Extremely Stable, Relatively Unaffected by pH, Temperature, Aeration or Sunlight
- ✓ Beneficial to the Skin and Hair and Heals Many Skin Ailments
- ✓ Relieves Allergies or Sensitivities to Chemicals
- ✓ Bathing Suits and Liners will Stay in Original Condition
- ✓ Surrounding Plants and Landscape will Thrive Beautifully
- ✓ Enjoy a Rejuvenated and Refreshing Feeling and Smell
- ✓ Low Maintenance and Operating Costs!

MAINTANENCE

Maintain a residual Copper (Cu) level of 0.3 p.p.m in a pool and 0.5 p.p.m in a spa. Check your electrodes once a season to ensure they are clean and intact. Your electrodes will need to be replaced periodically depending on the water capacity, conductivity and usage. Electrodes should last one to three seasons in a pool, or years in a hot tub.
